

Job Description generator :

Here are the key design requirements for the Job Description Generator UI:

Summary : This web application utilizes AI to generate tailored job descriptions based on user-provided inputs

Functionality:

- **Input Fields:**
 - Job Title: Text input for users to enter the desired job title.
 - Industry: Dropdown or selection field for users to choose the relevant industry.
 - Tone: Dropdown or toggle for users to select the desired tone (formal, casual, etc.).
 - Output Format: Dropdown or selection field where users can choose the format of the generated job description (e.g., bullet points, paragraphs, combination)

Note : We may add more input fields so make it flexible please!

Generate Button: A clear and prominent button to initiate the generation process.

- **Output Display:** A dedicated area to display the generated job description in the chosen format

Note : We may have more than only one output and the user will have the freedom to choose (for instance the first output may contain Job Summary, Job Duties and Responsibilities, required skills, and the next one have more or less components)

Visual Design:

- **Workable Example as Inspiration:** Use the Workable Job Description Generator (<https://www.workable.com/job-description-generator>) as a starting point for inspiration, but feel free to suggest anything creative !
- **Emphasis on Output Format Selection:** Clearly highlight the "Output Format" section to emphasize the option for choosing the desired format.
- **Pay close attention to the display method :** Especially that we have different outputs and the differences between them should be clear as first impression.

Additional Considerations:

- **Responsiveness:** The UI should be responsive and adapt to different screen sizes (desktop, mobile).
- **Branding:** If applicable, consider incorporating **Thynk Tech** branding into the UI design.

Job Description Components

A job description contains the following components: job title, job purpose, job duties and responsibilities, required qualifications, preferred qualifications, and working conditions.

- **Job Title**
- **Job Purpose**
- **Job Summary** : For many candidates, less is better
- **Job Duties and Responsibilities**
- **Required Qualifications** :

Education

Experience

Knowledge, Skills, and Abilities

- **Preferred Qualifications** : Nice to have ,but are not essential
- **Working Conditions**

Additional Job Description Components :

- **Salary**
- **Company description**
- **Company culture** : You're advertising your company as much as the role
